LO: To explore the work of Karl Blossfeldt.

As we have been looking at patterns in natural form (leaves / flowers, pine cones, etc.), I would like you to research the artist Karl Blossfeldt and produce a fact file about the artist's background and his work.

Make your work as creative as possible, you could:

- Group background information about the artist into a box
- Cut out examples of his work
- Draw examples of his work
- Comment on the artist's work, giving your own opinion on what you like / dislike
- Comment on how the artist has captured different light / shade tones within his work

Below is an example layout for your fact file - you could even colour or patterns around your boxes.

The image shows a template for a fact file layout. It consists of four rounded rectangular boxes. On the left side, there is a single large vertical box. On the right side, there are three boxes arranged in a 2x2 grid, with the top-right box missing. This layout is intended for organizing information about the artist Karl Blossfeldt, such as background information, examples of his work, and personal opinions.
