

# Key Terms

# Topic Fact Sheet- Which birds and plants would Little Red Riding Hood find in our park?

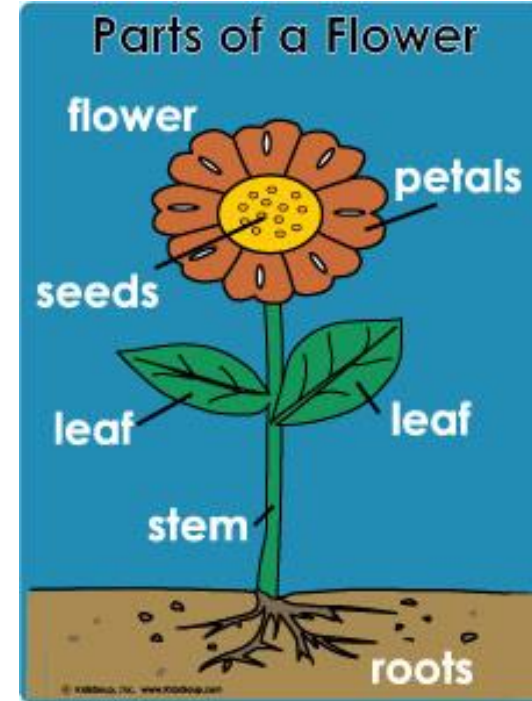

stem	the main part of a plant that grows up from the ground and supports the branches, leaves, flowers, or fruits that may grow from it.
leaf	one of the usually green, flat parts of a plant or tree that grows from the stem or branch.
root	the part of a plant that usually grows underground. Roots take up water and nutrients, and hold the plant in the soil.
flower	the part of a plant that has petals and that makes fruit or seeds Flowers often have a pleasant smell
petals	one of the separate leaves that form the outer part of a flower head. Petals are usually a different colour from the plant's other leaves.
deciduous	having leaves that drop off each year.
evergreen	a tree, bush, or other plant with leaves that remain green throughout the year.

## How does your garden grow?

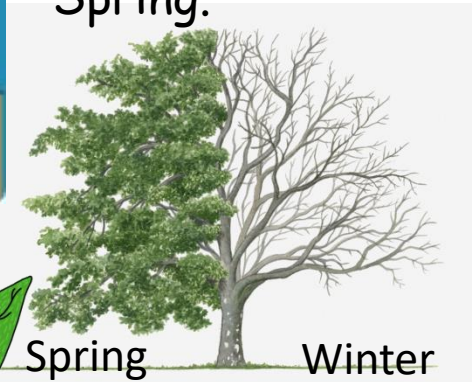

An **evergreen** plant does not lose its leaves in winter.

This fir tree is evergreen.

A **deciduous** plant has leaves that fall off every Autumn and Winter and grow back again in the Spring.

Spring Winter
