This is the first set of 'tricky words' that your child needs to learn. They cannot be sounded out and must be learned by sight. Why not cut them out and stick them on the fridge, in the bathroom, next to their bed or anywhere that your child will see them on a regular basis. A quick look at these words every day will ensure that your child will soon be able to recognise them without prompting. Please only spend a few minutes each day looking at these words.
