

27th February 2017

Dear Parents,

The theme for this year's British Science Week is "Change", encouraging young people to think about and investigate the changes happening in the world all around us; from seasons and climate, to materials and energy. It is also a chance for young people to consider the changes they can enact to have a positive impact on the future.

We are busy planning for an exciting Science week! To kick start the week we have arranged for 'Working Science' to come in and hold workshops for KS1 and KS2 on Monday 13th March. They are engaging workshops with lots of hands on science investigations and experiments.

KS2 will be taking part in the 'Sound and Vibration' workshop and KS1 will be experimenting with potions in the 'Bath Bombs and Bubble Bath' workshop.

This will be a fantastic day for the children to immerse themselves in Science. We are asking for a voluntary contribution of £4.80 per pupil.

Please can you send the money to school in an envelope with your child's name and class by Friday 3rd March.

If you would like to take part in science week at home, then you can join in the Citizen Science project: Penguin Watch. Find out more and get involved at www.penguinwatch.org

Also The Hive is running a Science Night on 16 March 16:30 - 18:30, for children, families and adults with lots to offer including informative talks by noted academics, hands on interactive displays and "Mad Science" shows throughout the evening. The event is free but you need to book <https://www.britishscienceweek.org/events/the-hive-science-night/>

Thank you for supporting our science week.

Handwritten signatures of Mrs Dean and Mrs Smith in black ink.
